

# SANDVIK COMPANY PROFILE

SOUTHERN AFRICA 2023

# SANDVIK GROUP

Sandvik is a high-tech and global engineering group offering products and services that enhance customer productivity, profitability and sustainability. We hold world-leading positions in selected areas – tools and tooling systems for metal cutting; equipment and tools, service and technical solutions for the mining industry and rock excavation within the construction industry; products in advanced stainless steels and special alloys as well as products for industrial heating.

## OUR PURPOSE AND STRATEGY

**“We make the shift – advancing the world through engineering.”**

The new purpose expresses how our innovative solutions create value not only for our customers and employees, but also for society and the planet, ultimately creating shareholder value. It further aligns and supports the Group’s future direction, culture and strategy.

The central idea behind the strategy is to enable important shifts in the world, such as digitalization and sustainability. To that end, six strategic objectives have been introduced: Shift to growth, sustainability shift, the digital shift, the customers’ first choice, the employer of choice and agile through the business cycle.

**150 COUNTRIES**

around the globe

**40 000**

employees worldwide

# BUSINESS AREAS

The Sandvik Group conducts operations in four business areas with responsibilities for research and development (R&D), production and sales of their respective products and services.

## SANDVIK MINING AND ROCK SOLUTIONS

A global leading supplier in equipment and tools, parts, services and technical solutions for the mining and construction industries.

Application areas include rock drilling, rock cutting, loading and hauling, tunnelling and quarrying.

## SANDVIK ROCK PROCESSING SOLUTIONS

A leading supplier of equipment, tools, parts, services and solutions for processing rock and minerals in the mining and construction industries.

Applications include crushing, screening, breaking and demolition.

## SANDVIK MANUFACTURING AND MACHINING SOLUTIONS

A market-leading manufacturer of tools and tooling systems for advanced industrial metal cutting. Products are manufactured in cemented carbide and other hard materials such as diamond, cubic boron nitride and special ceramics. The business area also comprises the areas of additive manufacturing and digital manufacturing.

# CORE VALUES

Our core values are the heart of our culture and identity. They support our vision and guide us in our actions.

Our core values are:

## CUSTOMER FOCUS

We constantly strive to exceed our customers' expectations and enable them to excel in their business.

## INNOVATION

We shape the future by creating pioneering solutions throughout our operations.

## FAIR PLAY

We conduct business in a sustainable and responsible manner.

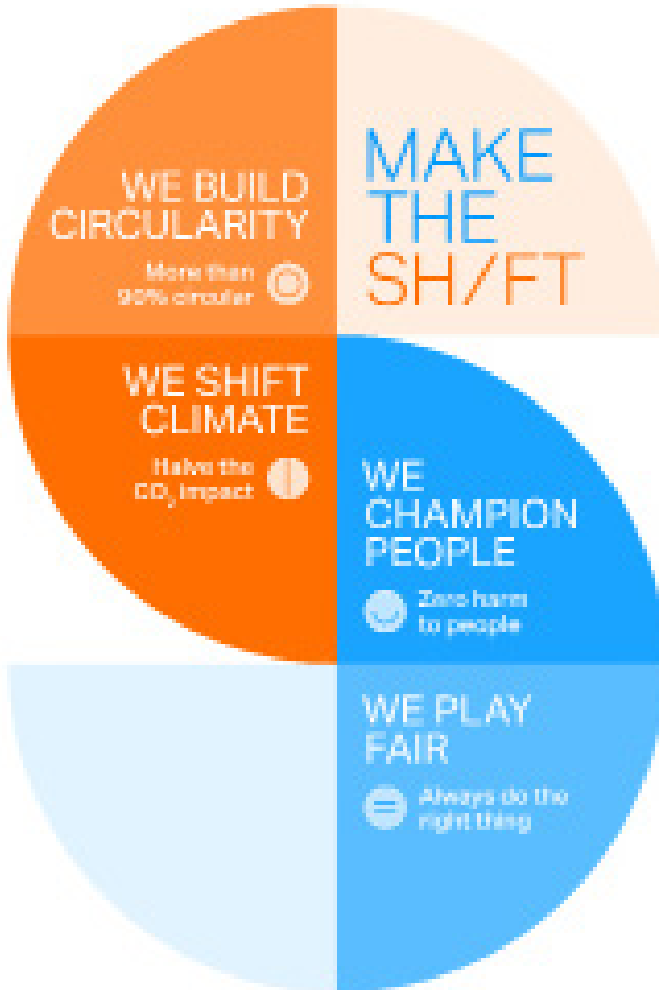

## PASSION TO WIN

We are passionate about making our company number one.

# SUSTAINABILITY

We are committed to using engineering and innovation to make the shift that will drive more sustainable business. To achieve this, we are focusing on four sustainability goals for 2030.

# SANDVIK MINING AND ROCK SOLUTIONS

Business area Sandvik Mining and Rock Solutions is a global leading supplier in equipment and tools, parts, services and technical solutions for the mining and construction industries. Applications include rock drilling, rock cutting, loading and hauling, tunnelling and quarrying.

The focus lies on bringing value to customers through high-performing products that increase productivity and safety as well as to provide services and flexible maintenance programs that extend uptime and cut costs.

A fast-growing part of the business area's offering is solutions for automation and remote monitoring of equipment, which increases operational efficiency and process reliability. The mine automation systems cover all aspects of automation, from single equipment to full fleet control.

# SANDVIK ROCK PROCESSING SOLUTIONS

Business area Sandvik Rock Processing Solutions is a leading supplier of equipment, tools, parts, services and solutions for processing rock and minerals in the mining and construction industries. Applications include crushing, screening, breaking and demolition.

The focus lies on bringing value to customers through high-performing products that increase productivity and safety as well as to provide services and flexible maintenance programs that extend uptime and cut costs.

A growing part of the business area's offering is targeted towards more energy-efficient communication, processes and technologies together with larger data sets to meet future customer requirements. This contributes directly to the industry's target of sustainable communication, protecting the environment, and reduction of operational costs.

## GLOBAL BUSINESS - LOCAL PRESENCE

Sandvik Southern Africa has been in existence since 1948. Our geographic diversity is mirrored by our cultural diversity, rich population, many languages and ethnicities.

As a company we operate in the same economic sphere as our customers. We, therefore, have a firm grasp of the challenges of the local environment. We understand that companies need to find solutions that are cost-effective, reduce operational spend and focus on streamlining operations for maximum benefit. Building on the tradition of localisation and ensuring the conviction that there can be no substitute for direct service and contact.

Sandvik Southern Africa is increasing the company's footprint in Africa. We achieve this by operating in South Africa, Zimbabwe, Namibia, Botswana and Mozambique.

Our products and services are aimed at improving our customers productivity and profitability. Our aftermarket support becomes a vital component of the way in which our customers do business. To this end the company has major workshop facilities that can cater for full rebuilds and component repairs. These are located in Kempton Park and Harare.

Sandvik Southern Africa fully understands lifetime cycle costing from cradle to grave as well as any inherent technical issues that can affect the operations. All of these enable us to react quickly and effectively to provide improved customer service.

# SANDVIK KHOMANANI - SOUTH AFRICA

The state-of-the-art Khomanani facility in South Africa includes three large workshop areas and office space on a 62,000 square metre site.

As the Tsonga name Khomanani reflects – “hold each other together as a unit” – our new home unites us under one roof to collaborate, adapt and learn as we strive towards higher standards. The technical synergies of the workshops add to our commitment and capacity for local production that meets global quality requirements.

Two of the workshops are dedicated to refurbishment and rebuilding of local equipment for the Southern African region – mainly Botswana, Namibia and South Africa. This is where new standard-format equipment is configured for local use, typically including features like safety systems, lighting, toe-hitches and decals to customer specifications.

Our remanufacturing facility allows us to completely rebuild machines to OEM standards, including the sub-assembly refurbishments on transmissions, axles, differential and pump motors.

The first workshop has 23 bays for machines to be refurbished, while the second is specially equipped with 100 tonne capacity flooring for the heavier tracked equipment such as underground continuous miners and surface drill rigs. The fit-for-purpose layout of the spacious site allows the heavy transport vehicles to loop in and out with equipment without needing to manoeuvre, improving workflow and efficiency. A combination of cranes from 5 tonne to 30 tonne capacity – as well as a specialized 50 tonne forklift – facilitate safe and quick off-loading and reloading.

The third workshop focuses on local assembly of equipment for both South African, as well as global markets to Sandvik’s well-known high OEM standards.

Our investment in local manufacturing capacity is an important vote of confidence in South Africa and its mining sector. The quality of our work is also world-class, allowing Sandvik to shift certain manufacturing duties from elsewhere in the world, to our new facility.

In line with Sandvik’s international guidelines, the design of Khomanani prioritizes energy and water efficiency. With a shared solar photovoltaic system and the use of LED light bulbs, the building is expected to achieve a 48% saving on energy, also making greater use of natural light, roof insulation and ‘low-E’ coated glass. Water-efficient fixtures, fittings and systems, as well as rainwater harvesting, will improve water consumption levels by 42%.

# PRODUCT AND SERVICE AREAS

## UNDERGROUND DRILLING

Sandvik underground drill rigs are specifically designed to suit mining applications and to maximise productivity. Equipped with high-performance hydraulic rock drills, ergonomic controls and various levels of automatic drilling systems, making them highly productive, extremely reliable and economical machines.

## LOAD AND HAUL

Sandvik underground loaders and haul trucks are engineered for safety, productivity and reliability in the toughest mining applications. Rugged, compact and highly manoeuvrable, the ergonomic equipment offers enormous capability for its size and returns a low cost per ton.

## MINE AUTOMATION

Sandvik's automation expertise is the result of years of research, development and close collaboration with our customers. Today, we offer the most advanced automation solutions in the industry. These solutions significantly increase productivity and safety, as well as lower the total cost of ownership. We offer a wide variety of optimised products for unique mining needs.

## PARTS AND SERVICES

Having great equipment is only part of the story, what makes working with Sandvik an unbeatable experience is the blend of lifetime support we can provide through our broad offering of genuine parts & components, services and digital innovations.

# ROCK TOOLS

Through proprietary production processes and extensive in-house R&D, we continuously develop new rock drilling tools and cemented carbide grades that improve operations and deliver superior performance and lower costs. Our latest generation of carbide grades and new larger, tougher tools make rock drilling more productive and profitable.

# SURFACE DRILLING

In order to meet the demands of mining and rock excavation industry, Sandvik surface drill rigs are all designed to work effectively in the toughest conditions. This is why we invest heavily in R&D delivering true power with absolute precision through the latest technical innovations, our unique drilling rigs are the best in the business.

# MECHANICAL CUTTING

All Sandvik mechanical cutting offers extensive safety features. Flameproof products are tested in realistic conditions ensuring their suitability for use in coal mines. The onboard dust suppression and methane dilution systems are tested by specialized simulation software. This is to reduce dust and improve visibility, ultimately providing healthier and safer working conditions for the machine operators.

# CRUSHING & SCREENING

Our constantly evolving offering for mining and construction covers crushing, screening, breaking, demolition and service solutions. Our products provide maximum value in terms of performance, quality, safety, flexibility and — not least — total economy.

# CORPORATE SOCIAL INVESTMENT

Sandvik Southern Africa aims to make a meaningful and sustainable impact in the communities in which we operate, to use corporate social investment to enhance the employer and corporate brand of Sandvik and make it more visible in our communities, drive employee participation and volunteerism in CSI activities and identify initiatives that are Sandvik owned. We focus our sponsorship and community involvement in the following areas:

**Education and Innovation** - Sustainable learner and educator focused initiatives, address the education crisis in the country with a focus on math and science, link to skills development and future skills required by the organization and the country.

**Health** – Address the health challenges experienced by the most vulnerable in society, partner with credible institutions/NGOs, focus on access to healthcare.

**Sports, Arts and Culture** – Projects to celebrate the soul and history of the communities and promote youth development.

**Emergency or Disaster relief** – A portion of the funds to be set aside to respond to natural disasters in which we and our customers operate.

Sandvik Mining RSA (Pty) Ltd allocates a minimum of 1% of its net profit after tax annually to corporate social investment. This spend contributes to the socio-economic development (SED) points for the company's Broad-Based Black Economic Empowerment (B-BBEE). A corporate social investment (CSI) committee is in place to oversee the strategy and execution of the company's socio-economic investment in line with the company's B-BBEE, business and sustainability goals.

# SAFETY

Safety is paramount at Sandvik. Our EHS Vision is to achieve Zero Harm to our people, the environment we work in, our customers and our suppliers. We are committed to creating a sustainable future through an approach firmly grounded in Sandvik's core values.

Our strong EHS culture:

- Arises from our Values and is fully integrated into the way we do business
- Relies on everyone being committed to our strategy and taking personal responsibility
- Is supported by effective management systems and processes
- Delivers sustainable and continuous improvement

We are ISO14001, OHSAS 18001 and ISO 9001 certified.
